

PUBLIC EXHIBITION

Centre of Excellence for Dementia and Neurology

University College London (UCL) is inviting you to have your say on exciting proposals to create a world-class facility to tackle dementia and neurological diseases such as Alzheimer's disease, Multiple Sclerosis, Huntington's disease and Motor Neurone disease on the site of the Eastman Dental Hospital.

Disabling neurological conditions affect more than four million people in the UK alone and account for about 13% of global diseases, more than cardiovascular disease and cancer. In Camden, 1,256 people aged over 65 were diagnosed with dementia in 2016.

Please visit us at our public exhibitions:

Thursday 27 September

2pm-7pm

London Welsh Centre,
157-163 Gray's Inn Road,
Holborn, WC1X 8UE

Saturday 29 September

11am-3pm

London Welsh Centre,
157-163 Gray's Inn Road,
Holborn, WC1X 8UE

A dedicated dementia research centre can investigate the links between these illnesses to further understand them and work towards better treatments and potential cures.

Map showing the Eastman Dental Hospital site and the exhibition location

The new biomedical facility on Gray's Inn Road will host the central hub of UK Dementia Research Institute (UK DRI) and the University's leading Queen Square Institute of Neurology (IoN). UCLH (University College London Hospitals) is also exploring the possibility of including NHS services on the site. Our aim is to provide the most comprehensive, coordinated neuroscience research centre in the world; from research at laboratory benches to patient care at bedsides.

The project team will be on-hand to discuss the proposals with you. If you would like to find out more about the events please contact:
